Frage (öffentlich)

Is it possible to import marketplace product listings into my webshop via magnalister?

Lösung (öffentlich)

From a technical point of view, a product import from a marketplace into your webshop system
cannot be guaranteed to be 100% reliable. The database structures between online store systems
and marketplaces are too different for this.

Since we cannot guarantee a flawless product import into your online store, such a function is not
available. It is also not to be expected that a reliable system will be available from marketplaces
and webshop systems in the near future.

Should anything change in this regard in the future, we will of course take a closer look at such a
function. Until then, however, the basic requirement for magnalister is that all items are created in
your online store.
